Call for Participation

jcdl 2009
designing
tomorrow,
preserving
the past—
today.

JCDL 2009 invites papers, posters, demonstrations, as well as tutorials, workshop and panel proposals that will make the conference an exciting and creative event to attend. Participation is sought from all parts of the world and from the full range of disciplines and professions involved in digital library research and practice, including computer science, information science, librarianship, archival science and practice, museum studies and practice, technology, medicine, social sciences, and humanities.

Paper Submissions

Authors may choose between two formats: full and short papers. Both formats will be rigorously peer reviewed.

Full papers report on mature work or efforts that have reached an important milestone. Full papers must not exceed 10 pages.

Short papers report on significant results that do not require the full paper length for exposition. Short papers might highlight exciting early results or can present theories or systems that can be described concisely in the limited space. Short papers must not exceed 4 pages.

All papers must be original contributions. The material must not have been previously published or be under review for publication elsewhere. Both formats will be included in the proceedings and will be presented at the conference. **All accepted papers will be published by ACM as conference proceedings and electronic versions will be included into the ACM Digital Library.**

Topics include, but are not limited to:

- *Interfaces to information for novices and experts*
- *Cyberinfrastructure services and digital libraries*
- *Personal digital libraries*
- *Social architectures for digital libraries*
- *Information visualization*
- *Retrieval and browsing*
- *Data mining/extraction*
- *Enterprise-scale information architectures*
- *Distributed information systems*
- *Studies of information behavior and needs*
- *Insightful analyses of existing systems*
- *Information policy and copyright law*
- *Deployment of digital collections in education*
- *Digital library curriculum development*
- *Systems and algorithms for data preservation*
- *Theoretical models of information interaction*

All Submissions

All contributions (papers, posters, demonstrations, as well as proposals for tutorials, workshops and panels) must be written in English. All submissions are to be made electronically in PDF format and following ACM format guidelines. To prepare their submissions, authors should use the ACM template available at: http://www.acm.org/sigs/publications/proceedings-templates

Important Dates:

January 23, 2009	**All papers are due by 5pm CST.**
January 31, 2009	**Poster and demonstration submissions are due by 5pm CST.**
January 31, 2009	**Tutorial, panel, and workshop proposals are due by 5pm CST.**

Specific formatting and submission requirements can be found on the JCDL 2009 Web page at:
